WHEN
PERFECTION
BECOMES
OBSESSION
MAGICAL
THINGS
ARISE

MARCEL HIRSCHER'S STORY IS ONE-OF-A-KIND.

Competing at the highest level for 15 years, he profoundly changed the world of ski racing by setting new standards with his exceptional talent, technical skills, race intelligence, training methods, and physical fitness. What really set him apart from everybody else, though, was his professional, no-compromise approach to his equipment.

Marcel's obsession for tinkering and fiddling with things and his perfectionism often drove people mad. But his ability to translate his intuition and extraordinary feeling for both snow and gear into innovation have made him one of the most successful alpine skiers of all time.

The fact that Marcel has achieved everything there is to achieve in alpine skiing is also a result of his long-standing partnership with Red Bull. And so it comes as no surprise that this collaboration has created a common vision. Being an innovative ski manufacturer, VAN DEER-Red Bull Sports is ushering in a new era to take skiing to the next level – with pooled knowledge, an uncompromising winning spirit and drive for perfection. Not just on the racecourse, but also in Marcel's new favorite playgrounds: backcountry and big mountain.

RACE SERIES

As Marcel Hirscher once said: "You can be the best skier in the world, but without the best equipment you will never win." We want you to win. We want you to ski at top speed, push your limits and conquer new terrain on the race course. Inspired by his 67 World Cup victories, 12 World Championship titles, 8 overall World Cup titles, 7 World Championship titles and 2 Olympic gold medals, Marcel Hirscher has developed a range of FIS-compliant race skis designed to be game-changers for your career. With his unrivaled experience and relentless pursuit of perfection, our World Cup skis are handcrafted and equipped with the same race room finish that brought Marcel Hirscher to the top of the podium. Even if you're not a Worldcup athlete yet, you'll experience that World Cup performance every time you take your skis to the race course.

SL WORLD CUP

The SL WORLD CUP is a high-performance slalom ski developed and tested by Marcel Hirscher, winner of 32 World Cup races, 6 globes and 3 gold medals in slalom. Built for the tightest lines and fastest times, it delivers explosive power in slalom turns, ultra-fast edge-to-edge agility, maximum edge grip and stability on the toughest race courses. With our unique torsion box sandwich construction, it combines an ash/poplar wood core with double layers of titanal and carbon for maximum reinforcement. Add full ABS sidewalls, prepreg composite layers, race edges, a P-Tex race base, a genuine race room finish (and a few other secret ingredients), and you have a high-performance slalom ski engineered to help you chase every hundredth of a second on race day.

The SL WORLD CUP will continue from the 2024/25 season, maintaining the well-known performance, with nothing standing in the way of success. The trusted Marker plates and bindings will still be used, with the bindings proudly featuring our CI Racing Gray color.

TECHNICAL DETAILS

RANGE	COLOUR	SIDECUT	RADIUS	WEIGHT
SL WORLD CUP, 155cm w/ INTERFACE 10 mm V24SL1604.155.01.PL	Gray	117-66-102mm	11m	1600g ⁽¹⁾

SL

The SL is inspired by the well-known SL WORLD CUP and features a performance slalom ski designed for everyday enjoyment on the slopes. With its racing heritage and practical FDT binding, it's the ideal choice for any skier looking for a reliable slalom experience. The SL is built with thicker edges and a highly durable korund top sheet, ensuring longevity and resilience. The SL is the youngest member of the RACE SERIES.

GS WORLD CUP

Developed and proven by none other than Marcel Hirscher, the GS WORLD CUP is ready to dominate giant slalom races at the highest level. With 31 World Cup wins, 6 globes and 2 gold medals in giant slalom, this premium ski allows you to find your winning line, no matter the course or conditions. It features an ash/poplar wood core with double layers of titanal and carbon for maximum stability and powerful acceleration out of every turn. Full-length ABS sidewalls and race edges provide incredible hold, while a P-Tex race base combined with Marcel's real race room finish (and a few other magical ingredients he prefers to keep to himself) will keep your time in the green when you cross the finish line.

The GS WORLD CUP will continue from the 2024/25 season, maintaining the well-known performance, with nothing standing in the way of success. The trusted Marker plates and bindings will still be used, with the bindings proudly featuring our CI Racing Gray color.

JUNIOR PRO SERIES

No one is born as a World Cup champion—not even a living legend like Marcel Hirscher, who has conquered every accolade in alpine ski racing, including a record-breaking eight World Cup titles in a row, 67 World Cup victories, 20 crystal trophies, and 14 medals at major championships. For young, aspiring ski racers, reaching the top demands hard work, dedication, a bit of luck, plenty of sweat, and sometimes even tears. It also requires significant support from coaches, family, and friends—and, of course, top-notch equipment.

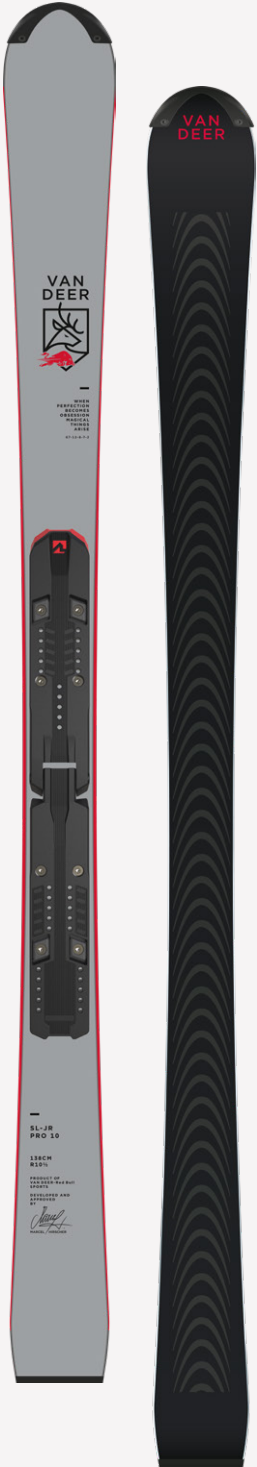

That's where we come in. Our goal is to provide you with an unique competitive equipment, which is why we craft our JUNIOR PRO SERIES just like our RACE SERIES using the same world-class materials and race room finish, handmade by our World Cup racing experts. Our SL-JR PRO and GS-JR PRO skis not only meet all FIS regulations, but they have also been developed and approved by Marcel Hirscher himself.

SL-JR PRO

The SL-JR PRO is a premium Junior Race ski that leaves no room for compromise, developed and approved by Marcel Hirscher. It's a precise replica of our SL WORLD CUP skis, constructed and tuned with the same cutting-edge technology, expertise, materials, and meticulous attention to detail. It's a perfect match for aspiring racers who take their skiing as seriously as the world's elite.

With explosive power out of slalom turns, rapid edge-to-edge agility, exceptional edge grip, and remarkable stability, the SL-JR PRO is designed to help you navigate the slalom gates at high speed—and onto the top of the podium. Are you ready to follow in Marcel's footsteps?

Starting from the 2025/26 season, the SL-JR PRO will feature the same graphics as their FIS ski counterparts. Additionally, this series will be equipped with Marker plates and bindings. The series will be expanded in the 2025/26 season to include a 152cm length, which will be available in a limited quantity.

GS-JR PRO

Developed and approved by Marcel Hirscher, the GS-JR PRO is engineered to dominate junior ski races. This FIS-compliant Giant Slalom ski offers exceptional stability, impressive speed, high acceleration, and uncompromising performance. It is constructed identically to our GS WORLD CUP skis, utilizing the same high-end materials and race room tuning that helped Marcel secure his GS World Cup victories, GS globes, and gold medals. It's a perfect for aspiring racers who take their skiing as seriously as the world's top athletes. Welcome to a new generation of skis engineered for young champions.

Starting from the 2025/26 season, the GS-JR PRO will feature the same graphics as their FIS ski counterparts. Additionally, this series will be equipped with Marker plates and bindings. The series will be expanded in the 2025/26 season to include a 169cm length, which will be available in a limited quantity.

PRO SERIES

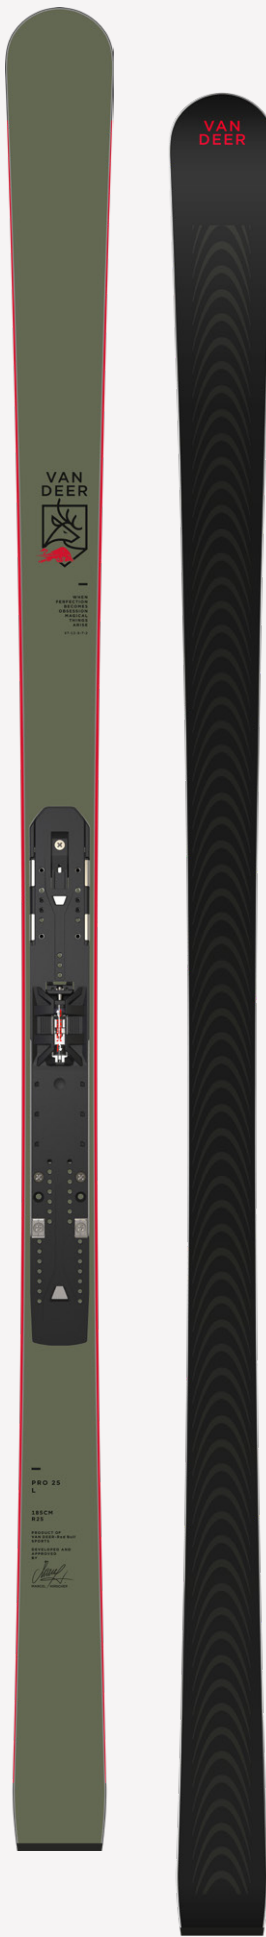

When Marcel Hirscher decides to enjoy an easy groomer day, he reaches for his PRO SERIES. But don't let Marcel's idea of "easy" fool you—these are high-performance skis designed for aggressive on-piste charging or fast gate turns. Slightly easier to handle than our GS WORLD CUP, the PRO SERIES are the perfect go-to skis for a powerful carving session all day long.

Constructed as exact replicas of our GS WORLD CUP skis, they are built using the same cutting-edge technology and meticulous attention to detail. Because they aren't bound by FIS regulations, we've given them a wider geometry on the tip and tail, along with increased sidecut. What does this mean for you? A tighter turn radius and enhanced skiability. Whether you're an elite athlete like Marcel or a dedicated skier looking to carve the perfect line, these skis will be your go-to choice for all-day performance.

PRO

The PRO has everything you need to unleash your inner racer: precise edge grip, exceptional stability, powerful acceleration, and top speed for carving turns on-piste or navigating through the gates. This premium high-performance ski is handcrafted in Austria using the same top-quality materials as our RACE SERIES. The key difference is its wider geometry and a smaller 18m radius (at 164 cm), making it enjoyable for both pros who obsess over hundredths of a second and ambitious piste skiers alike. Rest assured, it has passed the ultimate test: Marcel Hirscher developed and personally approved the PRO, ensuring it received a professional manual race room tuning so you can perform at your best from start to finish. Whether you're an athlete or an ambitious piste skier, our PRO SERIES is crafted to feel like home on the slopes.

The PRO SERIES is the heart of the family. Starting from the 2025/26 season, it will also be equipped with the proven Marker plates and bindings designed in the VAN DEER-Red Bull Sports khaki color.

PRO RS

The PRO RS is designed to excel on GS courses and carve through the gates at high speeds. Built with the same top-tier construction and premium materials as our RACE SERIES, it features a tighter 25m turn radius that makes it easier to carve perfectly on hardpack and icy runs.

With exceptional edge hold, maximum stability, and powerful acceleration out of every turn, this premium ski is equipped with full ABS sidewalls, race edges, and a P-Tex race base, all finished with Marcel's authentic race room finish. Whether you're a professional athlete or an ambitious piste skier, the PRO RS empowers you to perform at your best from top to bottom.

The PRO RS is the heart of the family. Starting from the 2025/26 season, it will also be equipped with the proven Marker plates and bindings designed in the VAN DEER-Red Bull Sports khaki color.

H-POWER 68 SAND

The H-POWER 68 is a high-performance piste ski approved by Marcel Hirscher and designed to elevate your skiing when conditions are groomed, firm, and fast. Loaded with World Cup technology, it's a confidence-inspiring carver that's easy to handle yet grips and powers through turns like a true race ski. Built for quick, slalom-style turns with uncompromising edge hold, the H-POWER 68 gives you the thrill of a World Cup experience on hardpack during those crisp early-morning sessions.

With a sleek 68 mm waist, the H-POWER 68 is crafted for agility and control. Compared to the SL WC model, it features slightly less sidecut and a bit more length, providing a balanced ride with enhanced stability. Two layers of titanal paired with an ash/poplar wood core ensure powerful energy transmission. Welcome to the precision and passion of VAN DEER-Red Bull Sports skiing!

The H-Power 68 remains a steadfast pillar in the lineup and will continue unchanged for the 2025/26 season. This model will still feature Look bindings and plates.

H-POWER 78

The H-POWER 78 is built to conquer every part of the mountain—on and off-piste—this ski is an easy choice for almost any day of the season. With Marcel Hirscher’s endorsement, it’s no surprise that the H-POWER 78 delivers top-tier performance on hardpack, rivaling true race skis with its grip and precision, even on the iciest days. At the same time, it’s lightweight yet robust, nimble, and incredibly versatile, so you’re always ready to dip into the backcountry when fresh powder is calling.

Engineered for maximum stability and edge hold in every turn, the H-POWER 78 boasts a poplar wood core reinforced with dual titanal layers, full ABS sidewalls, race edges, a P-Tex race base, and a race room finish—100% Marcel-approved.

Starting from the 2025/26 season, the H-POWER 78 will feature a new design and a practical FDT binding. To preserve tradition and its core essence, this ski has been kept in the VAN DEER-Red Bull Sports khaki CI color.

H-POWER 89

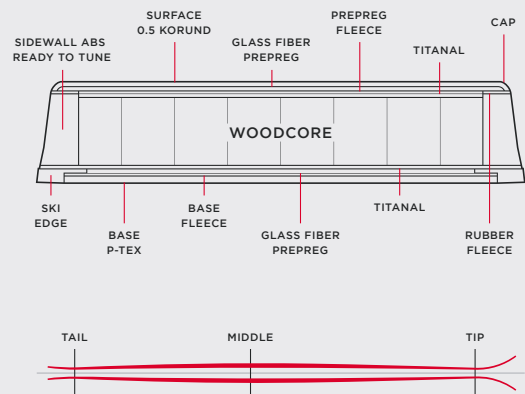

The brand new H-POWER 89, the widest ski in the H-POWER SERIES, is made to excel in the backcountry while offering uncompromising performance on the slopes - a true all-rounder for every day of the season.

It delivers awesome hard surface power and thanks to its wider construction, it also provides outstanding float in deep snow. At the same time, the ski remains light, maneuverable and versatile - perfect for spontaneous adventures when fresh powder is calling.

The H-POWER 89 offers uncompromising stability and excellent edge hold in every turn, whether on-piste or off-piste. Equipped with a poplar-beech wood core surrounded by two layers of titanal, full ABS sidewalls, racing edges, a P-Tex race base and a genuine race room finish, it offers unbeatable performance and versatility. 100% Marcel approved.

The H-POWER 89 is the youngest member of the H-POWER SERIES and has been designed for all terrains. Like its sibling, the H-POWER 78, this ski has a racing-inspired construction that provides plenty of energy and fun on the slopes. As a new model, it has also been given a new design, the color ochre and a practical FDT binding.

FREERIDE SERIES

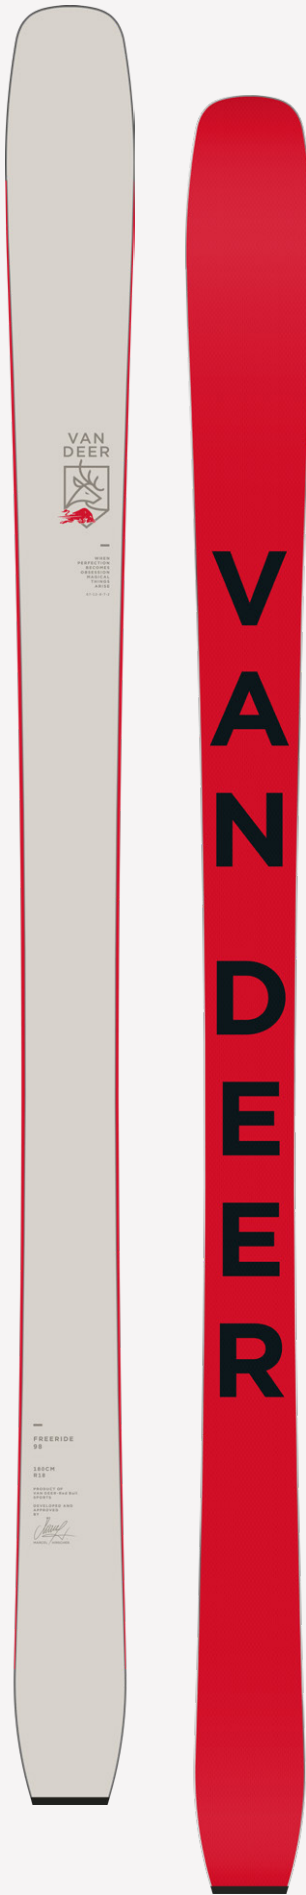

Marcel Hirscher is one of the most accomplished ski racers in history, earning the title of 'the greatest alpine skier of our time'. To confine his extraordinary skills to gates and racecourses would be a disservice to his talent. He is an exceptionally versatile skier, excelling on icy surfaces as well as in the deepest powder, and everything in between.

This passion for skiing inspired him to design his own series of freeride skis, engineered to tackle any challenge the mountain presents. These skis are the perfect companions for exploring uncharted territory. Available in a range of widths, they offer the versatility to handle everything from fresh powder to mixed conditions and groomed runs. With these skis, you can experience an extraordinary day on the mountain, no matter the terrain or weather conditions.

FREERIDE 98

Introducing the FREERIDE 98, the ultimate all-terrain freeride ski designed to elevate your skiing experience. Whether you're carving perfectly groomed runs or exploring the untracked depths of the backcountry, this ski is a favorite choice of Marcel Hirscher himself. With a 98mm waist, the FREERIDE 98 strikes the perfect balance between versatility and performance, delivering a playful ride across various conditions. Enjoy effortless floatation in powder, solid grip on hard-packed snow, agile maneuverability in the trees, and exceptional stability at high speeds.

Featuring a surfy tip rocker, it brings a poplar wood core reinforced with double titanal and carbon layers, full ABS sidewalls, race edges, and a P-Tex race base. With Marcel's meticulous race room finish and a few secret enhancements that make this ski truly special, the FREERIDE 98 is your perfect partner to conquer every terrain with confidence!

Starting in the 2025/26 season, the FREERIDE 98 will get a design update and hit the slopes in a new off-white color. As we are always striving to improve, a new base material has been implemented in this model, which will enhance both glide performance and durability.

FREERIDE 108

The FREERIDE 108 is a wide freeride ski designed for big mountain enthusiasts eager to tackle any terrain. With a 108mm waist, it's one of the most exhilarating skis developed by Marcel Hirscher. This ski excels in control, feels light in the air, remains stable at high speeds, and offers exceptional floatation in powder—making it your perfect companion for conquering the entire mountain from top to bottom. Featuring a surfy tip rocker, it is constructed using the same winning formula as the rest of our lineup, which includes a poplar wood core reinforced with double titanal and carbon layers, full ABS side-walls, race edges, and a P-Tex race base—along with some secret ingredients for enhanced performance. With Marcel's unwavering commitment to perfection, this ski brings a genuine race room finish as well. You are ready for the next snowfall.

Starting from the 2025/26 season, the FREERIDE 108 will be available in a new design, featuring the color Rock Ridge for a fresh look. As we are always striving to improve, a new base material has been implemented in this model, which will enhance both glide performance and durability.

FACTORY TUNING

We set a new standard for off-the-shelf ski tuning and preparation:
On every VAN DEER-Red Bull Sports ski.

When Marcel Hirscher founded VAN DEER-Red Bull Sports, his vision was making race skis available for every consumer. This does not mean that every VAN DEER-Red Bull Sports consumer needs to be a racer, but that every consumer deserves the same level of material, experience, tuning and set-up that Marcel receives as a World Class athlete.

As part of this vision, Marcel and Ferdl Hirscher, a selected team of experienced and uniquely capable experts, brought years of know-how and hours of testing into the tuning of every VAN DEER-Red Bull Sports ski model. Now, Marcel's dream has come true: consumers can experience the same first feeling on snow in a repeatable way: FACTORY TUNING.

This tuning is unique, and its recipe is strictly confidential. Our exclusive FACTORY TUNING can be repeated by scanning our unique QR code. This Code opens the potential of FACTORY TUNING and raises again the bar for your experience on and off the slopes.

Take your skiing to another level with our unique FACTORY TUNING coming on every ski modell.

MARKER COMP 10 TCX

Welcome to the world of youth racing. The COMP 10 TCX uses the same heel technology as in the Race XComp bindings, combined with the tried-and-tested TLT toe pieces and all perfectly adjusted to the weight and skiing performance of young on-piste racers. This binding enables top skiing performance with great power transfer.

MARKER COMP 13 FDT GW

The MARKER Comp 13 FDT GW is a premium, high-performance ski binding designed specifically for ambitious piste skiers. This advanced binding features the renowned FDT system for easy mounting on all MARKER FDT plates and offers precise performance for sales and ski tests alike. Built with only top-quality components, the one-piece Comp toe part and shock-absorbing technology provide excellent performance across all snow conditions. With its reliable Comp damper, short impacts are absorbed while maintaining consistent boot alignment, ensuring a smooth and responsive skiing experience.

MARKER COMP 12 GW

The Comp 12 GW is now also suitable for boots with GripWalk soles. It has the same high-quality design as all Comp models and includes DIN values from 4.0 to 12.0. The one-part screw connection of the toe piece by means of a 3-point hole pattern results in an extremely direct force transmission, which is not diminished by the absorbers underneath providing error-forgiving characteristics. The Comp absorber absorbs short, hard shocks and always keeps the ski boot optimally centered in the binding.

MARKER COMP 16

Maximum reliability and power at the highest speed and extreme edge angles on prepared slopes: the new Comp 16 with the TCX heel piece and adapted Comp toe piece. All components and materials belong to the top category. The binding features a more rigid heel piece and one-part toe piece built with magnesium components to withstand more pressure and delivers a more direct transmission of force to the ski thanks to a drilling pattern borrowed from the World Cup. At the same time, in the reverse direction, the feedback is more noticeable for the skier, making it easier for them to adapt to different slope conditions.

The tried-and-tested Z value of up to 16 enables optimum ski performance for all ambitious piste carvers and amateur racers.

MARKER COMP 20

Marker's Comp bindings have been an integral part of the Alpine Ski World Cup for years. Countless titles have been won with the Comp series. All tried and tested components such as the Twin Cam Competition heel or the Competition 4-linkage toe piece are being used again this season. Manufactured with only the highest quality magnesium components, the Comp 20 allows perfect centering on the ski. This is crucial for edge changes executed with extreme precision, even at the highest speeds. The responsive construction provides a super direct power transmission, making the binding very reliable in all situations - an absolute must, especially in competition.

The Comp 20 was born for competition and that is where the Comp bindings are at home. Fortunately, the Comp 20 is also a great recommendation for all sporty alpine skiers who want to get the most out of all slopes.

RANGE	DIN	BRAKES	WEIGHT

MARKER COMP 30

Marker's Comp bindings have been an integral part of the Alpine Ski World Cup for years. Countless titles have been won with the Comp series. Nowhere else is the cooperation between Marker engineers and athletes closer than in competition. The Twin Cam heel or the 4-linkage toe piece were developed this way and of course you'll find them in this year's Comp bindings. Manufactured with the highest quality magnesium components, the Comp 30 allows perfect centering on the ski. This means that edge changes can be made with extreme precision, even at highest speeds. The responsive construction, paired with incredibly direct power transmission, creates highest reliability in all situations - an absolute must, especially in races.

The Comp 30 with a DIN setting up to 30 was developed for World Cup competition to cope with the toughest slopes, highest speeds and most adverse conditions.

LOOK SPX 12 GW

The LOOK SPX 12 GW is a competition-level race binding designed for committed alpine ski racers in need of a lower DIN range. The strongest retention and longest elastic travel on the market deliver instant power transfer and precise control with superior shock absorption for reduced pre-release. Thanks to a smaller binding attachment area and semi-suspended heel piece, it provides enhanced control over the ski's flex during turns while retaining maximum precision.

This premium ski binding is compatible with the LOOK R22 and R21 race plate and with traditional Alpine (ISO 5355) as well as Grip-Walk® boots.

RANGE	DIN	BRAKES	WEIGHT

MARKER JR INTERFACE SHORT

Designed for the champions of tomorrow, the Junior Race Interface Short delivers exceptional power transmission tailored to light-weight riders. Engineered with a front elastomer for superior shock absorption and a shorter footprint, this plate ensures optimal ski flex, perfectly tuned for ambitious young athletes. Pair it with the MARKER COMP 10 TCX binding for unmatched performance on the slopes.

RANGE	STAND HEIGHT	WIDTH / LENGTH	SOLE LENGTH	WEIGHT/PC.
MARKER JR INTERFACE SHORT V25PL006	14 mm	58 / 465 mm	190 - 294 mm	220 g

MARKER JR INTERFACE PIVOT

Specifically designed for young racers, the Junior Race Interface Pivot meets the highest standards of performance and precision. It's fine-tuned for riders who excel at setting a hard, clean edge. Featuring a front elastomer for enhanced shock absorption and tip-and-tail free flex sections, this plate maximizes performance while keeping your skis highly reactive. Developed and tested to pair perfectly with the Marker COMP 10 TCX, it's the ultimate choice for ambitious young athletes ready to dominate the slopes!

RANGE	STAND HEIGHT	WIDTH / LENGTH	SOLE LENGTH	WEIGHT/PC.
MARKER JR INTERFACE PIVOT V25PL007	14 mm	58 / 505 mm	230 - 334 mm	250 g

MARKER INTERFACE 10 MM

The Piston® Control Interface is used on the Word Cup and comes with an integrated high-tech oil-hydraulic damper which converts energy directly into speed. The skiing experience is simply stunning, because the Piston® Control System only reacts to negative rebound and shocks, the turn initiation is faster, the edge grip more direct, effortless from turn to turn. Compared to the previous version, a softer center piece has been installed, which ensures a more homogeneous flex over the entire length of the ski. The new hole pattern with extended mounting options ensures optimum hold and function on all ski models. The new, more stable clamps ensure improved power transmission, especially at the end of the turn. It's a perfect match with all race skis and fully compatible with all MARKER Race bindings.

RANGE	STAND HEIGHT	WIDTH / LENGTH	SOLE LENGTH	WEIGHT/PC.
MARKER INTERFACE 10 MM V24PL002	10 mm	59/542 mm	260-362 mm	645 g

SKI BOOTS

Why a VAN DEER-Red Bull Sport ski boot? When asked this question, Marcel Hirscher's answer was immediate: "Ultimate ski performance always starts with the boot. And when skiers ask me about our skis, I ask first about their boots." Unlocking a ski's true potential requires the perfect ski boot so VAN DEER-Red Bull Sports decided to take our know-how and build our own from scratch.

The PRO BOOT embodies the ideal blend of sporty precision and exceptional comfort. Tested under race conditions by skiing legend Marcel Hirscher, the PRO BOOT is crafted for skiers who demand the highest standards.

VAN DEER-Red Bull
SPORTS

MARCEL HIRSCHER

PRO BOOT

The perfect set-up is the key to fast race times and maximum skiing enjoyment.

For us, perfection doesn't end with the skis - the ski boot also plays an essential role in exploiting the full potential. With the PRO BOOT, you achieve the perfect balance between sporty precision and exceptional comfort.

Derived from the World Cup racing ski boot and optimized for peak performance, the PRO BOOT delivers the precision of a racing ski boot. Thanks to its lightweight handling, the PRO BOOT is the perfect choice for skiers who value the highest standards and fun on the slopes in equal measure. With a 97 mm last, it offers a precise yet comfortable fit that encloses the foot securely and comfortably. With the same service our WC athletes enjoy, we pre-mount a lifter on the PRO and add a grip zone to increase walking security.

The high-quality Intuition liners are made from thermally adaptable foam, ensuring individual comfort. Within minutes, the liner adapts perfectly to the shape of the foot, creating a tailored fit.

Developed by VAN DEER-Red Bull Sports and personally tested under race conditions by Marcel Hirscher, the PRO BOOT is designed for the highest demands - ideal for anyone who refuses to compromise on the slopes.

TECHNICAL DETAILS

- Shell and Cuff Material: Polyurethane
- Shell Bootboard Material: Hard Polyurethane Foam
- Buckles: World Cup Buckles 7075 Aircraft Aluminum
- Liner: Intuition Liner thermoformable Foam for perfect fit incl. tongue

- General:
- Optimized fit
 - Optimized sole
 - Premounted lifters
 - Sidas powerstrap P2
 - Dual screw canting
 - Removable spoiler

MARCEL HIRSCHER

OPTIMIZED PERFORMANCE SOLE

Shorter soles mean better power transmission. While a standard ski boot in size 25.5 has a sole length of around 295 mm, the PRO BOOT is engineered with a reduced sole length of 288 mm in size MD 25.5. This optimized design enhances power transmission, ensuring maximum performance on the slopes and between the gates.

GEOMETRY

The geometry has been meticulously optimized, particularly in the toebox, where a unique design has been achieved. This innovation is the result of analyzing thousands of foot shapes, ensuring a perfect fit. The volume is precisely tailored to match the liner, delivering exceptional power transmission. This enhances control and elevates the overall skiing experience, maximizing both performance and enjoyment.

LIFTER

The PRO BOOT comes pre-assembled with the GFL (Grip Force Lifter). These specially designed lifters from VAN DEER-Red Bull Sports deliver outstanding grip on almost any surface, enhancing your safety without compromising performance on snow or between the gates.

LINER

The liner is specially created using top-quality materials, with its most important feature being in the innovative Intuition-padding. This technology allows the liner to perfectly mold to the shape of your foot in just a few minutes. This process can be repeated up to 10 times.

The liner also comes with an Ortholite insole for extra comfort and support. Additionally, the tongue is made with Intuition material, allowing it to fit perfectly to your leg, significantly improving comfort.

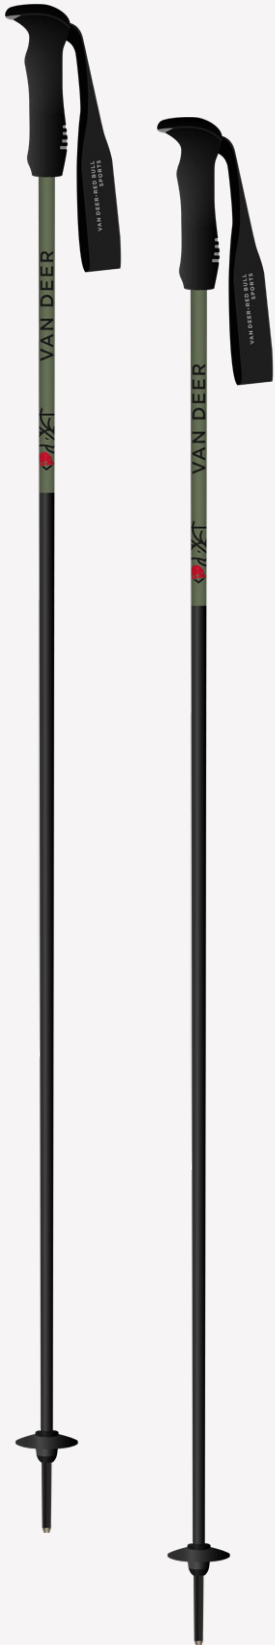

SKI POLES

Discover a new dimension of performance, innovation, and design with our premium ski pole collection. Each model is specifically crafted for passionate skiers and racers, featuring high-quality carbon for exceptional lightness, durability, and optimal swing dynamics. Whether carving on icy slopes or chasing record times, these ski poles deliver unmatched control and precision.

Ergonomic grips, adjustable straps, and advanced tungsten carbide tips ensure comfort and reliability in every situation. From versatile all-round models for the slopes to specially designed racing poles optimized for maximum precision and speed, this collection offers an unparalleled level of comfort, excellent power transmission, and absolute dependability. Elevate your skiing experience with gear that sets new standards for performance and excellence.

PISTE CARBON

The PISTE CARBON is the perfect premium ski pole for demanding skiers who want to go full throttle on the slopes. Its lightweight and extremely robust tube made of high-quality carbon ensures an optimum swing weight and maximum performance. The ergonomic 2-component rubber grip offers outstanding support and sits securely in the hand even on long descents. The innovative click-in strap guarantees optimum fit and control - curve after curve. With the Tungsten Carbide Flex Tip, you'll always have perfect grip even on icy surfaces, while the ultra-light mini tips have been specially developed for tough piste conditions.

A ski pole that sets standards in terms of quality, functionality and design.

TECHNICAL DETAILS

- 2-Component Rubber Handle (non-slip and stable)
- Click-In Strap (secure hold and easy entry/exit)
- Carbon Fiber Composite (Ø 13/9 mm)
- Tungsten/Carbide Flex Tip
- Mini UL Basket

RANGE	COLOUR

RACE CARBON

The RACE CARBON is a premium ski pole that has been developed to offer skiers maximum performance and control. Versatile in use, it is suitable for a wide range of disciplines. Its lightweight, slim yet extremely robust tube made of high-quality carbon ensures a perfect swing weight and excellent stability. The ergonomic, non-slip rubber grip in combination with the adjustable strap and the loop lock ensure a secure and comfortable hold, even on dynamic descents. The mini tip, specially designed for sporty use, ensures optimum power transmission, while the durable Tungsten Carbide Flex Tip offers excellent grip on hard or icy slopes. A ski pole that guarantees maximum precision and reliability for skiers of all levels.

TECHNICAL DETAILS

- Race Rubber Handle (non-slip and stable)
- Race Strap (secure hold and easy entry/exit)
- Carbon Fiber Composite (Ø 13/9 mm)
- Mini Race Basket
- Tungsten/Carbide Flex Tip

RACE GS CARBON

The RACE GS CARBON is a premium racing pole that has been specially developed for the hunt for the decisive hundredth of a second. Versatile in use, it is suitable for various disciplines in racing. Its light, slim and extremely robust tube made of high-quality carbon ensures a perfect swing weight and maximum performance. The ergonomic, non-slip race rubber grip and the specially developed race strap with loop lock offer an exceptionally secure and precise grip, even at high speeds. At the same time, the sophisticated design ensures comfortable handling in any situation. The mini race basket, optimized for racing, guarantees maximum performance, while the durable Tungsten Carbide Flex Tip offers perfect grip even on hard and icy slopes. The ideal pole for racers who want to perform at the highest level.

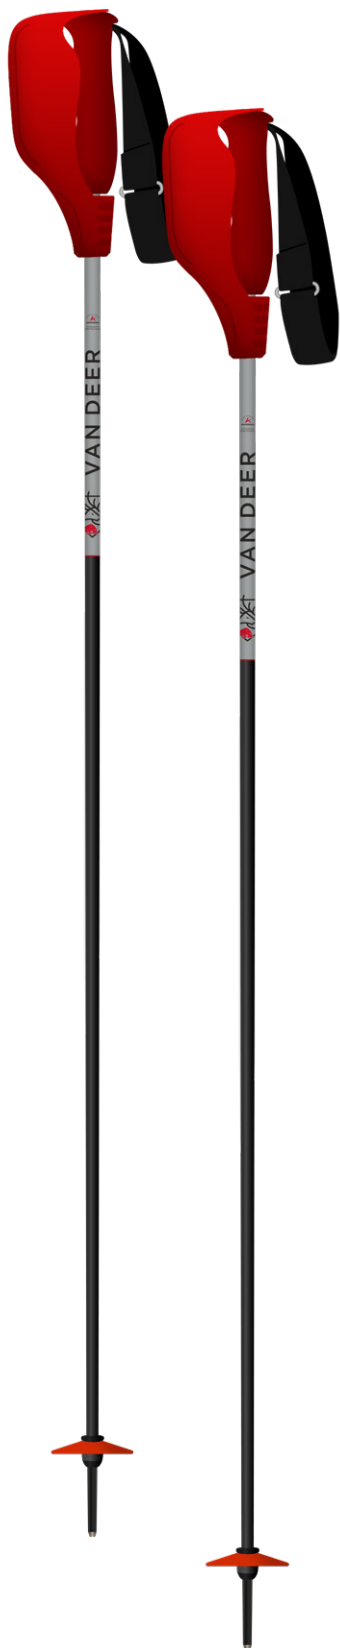

TECHNICAL DETAILS

- Technical rubber grip - optimum grip
- Racing loop with loop lock, makes it almost impossible to pull out
- Carbon, 12.3mm diameter - low weight and maximum performance
- Weight: 199g per pole at length 125cm
- Aero GS Basket

RANGE

	COLOUR
RACE GS CARBON, 115 cm V25ZU070.115	Gray / Black / Red

RACE SL CARBON

The RACE SL CARBON is a premium racing pole that has been specially developed for slalom races and helps racers to gain those crucial hundredths of a second. Already equipped with pre-mounted slalom handguards, it offers optimum protection and maximum performance. The lightweight, slim and extremely robust tube made of high-quality carbon ensures an outstanding swing weight that enables maximum agility and efficiency. The ergonomic, non-slip race rubber grip in combination with the race strap and the strap lock ensure a secure hold and maximum comfort - even during intensive runs. The specially developed slalom basket ensures precise control and stability, while the durable Tungsten Carbide Flex Tip provides perfect grip even on hard and icy slopes. The perfect companion for racers who value precision, control and performance.

TECHNICAL DETAILS

- Technical rubber grip - optimum grip
- Impact protection World Cup made of heavy-duty thermoplastic, absorbs hard impacts
- Racing loop for optimum grip
- Loop lock - makes it almost impossible to pull out
- Shrink tubing to reinforce the tube
- Solid screw connection for bombproof hold and no twisting of the impact protection

FREE CARBON

The FREE CARBON adjustable pole is a lightweight, robust telescopic freeride and ski touring pole. It's adjustable via the Carbon Powerlock, allowing for different pole lengths based on terrain and situation. Its comfortable 2-component rubber grip and the practical Ergo Click-In Strap provide a reliable grip, both uphill and downhill. Thanks to the non-slip rubber thermal grip zone you can easily and comfortably grip the pole lower through traverses or steep terrain without getting cold hands. Wide powder baskets prevent sinking in, and the robust Carbide Flex Tip ensures superior grip in pretty much any terrain.

TECHNICAL DETAILS

- Upper part: 16 mm aluminum 7075 T6 – Lower part: 14 mm carbon
- Touring Foam Grip
- Extended Foam Grip Zone
- Ergo Strap Click-In
- Large Deep Snow Basket
- Aluminum Powerlock 3.0 – strongest closure on the market – Carbide Tip
- Weight: 434 grams per pair without basket
- Adjustable: 110 - 140cm

ACCESSORIES

Teaming up with OGIO means teaming up with the best: OGIO can look back on more than 30 years of experience in the manufacture of bags for all those who want to know that their equipment is well stowed for all adventures – a fact that Marcel also felt when he lived out his great hobby of Hard Enduro in the summer and traveled with his OGIO equipment. That's how we found our partner of choice if it's about bags.

SKI CARRIER

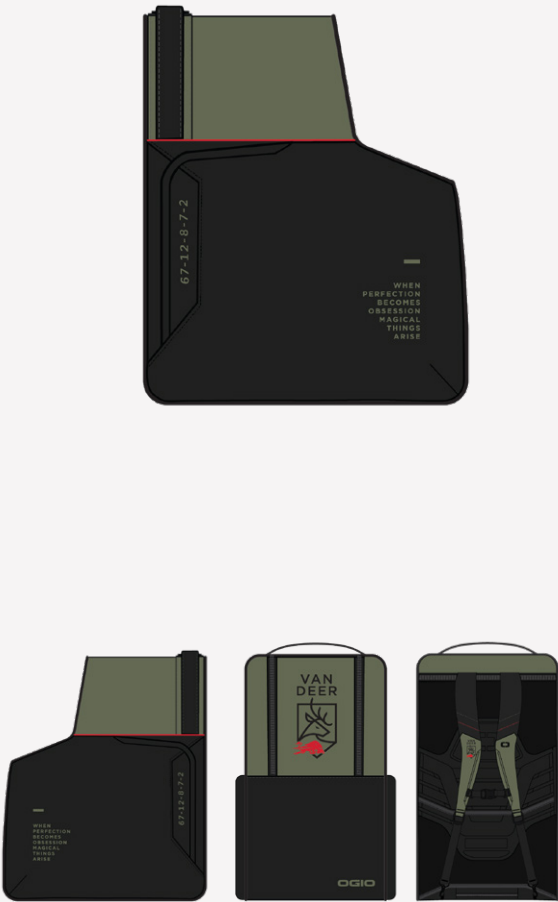

The SKI CARRIER was designed with versatility in mind. The adjustable design can transform to accommodate two pairs of skis from 140cm to 200cm in one expandable design built tough to endure the rigors of your outdoor adventures. Featuring a large top opening for easy access, customizable main compartment retention straps for poles and skis that is fully featured and value priced. A simple grab handle design allows you to move the ski bag to wherever you need to go or convert straps to a shoulder harness and carry over the shoulder. Additional storage under the lid stows a towel included to dry your edges prior stowing skis.

- Unique Ski/Pole Retention system can covert the SKI CARRIER to carry multiple sizes of skis.
- The SKI CARRIER can convert from a Double Ski/Pole platform to a Single Ski/Pole platform providing the ultimate in versatility.
- Innovative design can expand 15cm with a simple zip of the expansion panel to accommodate skis from 140cm to 200cm.
- Soft Touch Velcro retainer system provides support and protects your gear from scratches.
- Under lid storage area maximizes space and allows for storage of your towel.
- Multiple Carry handles include shoulder harness pad to allow for over shoulder carry style transport.
- External air vents allow breathability for drying while in storage.

FACTORY RACING SKIBAGS

If you are about to hit the race tracks, we've got you covered with our FACTORY RACING SKIBAG that keeps your DEERS protected wherever you go. This high-quality padded premium bag for up to three pairs of skis comes in our exclusive Factory Racing Design for a good reason: it's the skibag our World Cup athletes use all winter long when travelling the world. It's extremely hard-wearing and water-resistant outside and easy to clean inside. The external compression straps and sturdy buckles allow you to pack your skis tight so there's no damage to edges and bases. The bag is available in the following lengths: 185 cm for your slalom skis, 215 cm for your GS skis, and 240 cm to accommodate SG and DH skis.

RANGE	COLOUR	LENGTH	STORAGE
FACTORY RACING SKIBAG, SL V23ZU019	Black	188 cm	3 Pairs of Skis
FACTORY RACING SKIBAG, GS V23ZU018	Black	215 cm	3 Pairs of Skis

SKI STRAP

Our RACE STRAP is a small but essential piece of gear for skiers. This Velcro skifix securely holds your skis together, keeps them in place and protects your skis' edges and bases from damage, wherever you go. Marcel recommends two straps per pair of skis to protect your tune.
